DETAILED ACTION

This Allowance is responsive to the amendment filed March 22, 2005.

1. In the IDS filed 9/02/03, Applicant included a copy of the PTO-892 form (Notice of References Cited) from the parent case. However, this page did not appear to be scanned back into the system after being considered by the examiner. Therefore, the examiner has included these references into a PTO-892 accompanying this Office Action to make these references of record.
2. Claims 21-23 and 27-34 are allowed.
3. The following is an examiner's statement of reasons for allowance: The allowable subject matter of claims 21 and 27 has previously been set forth in the Office Action of December 22, 2004.

Regarding claim 30, this claim is allowable as it recites a sensor with "a tensile portion supported between the first and second intermediate ends" of the belt. Aoki (6,264,236) shows a seat belt and method used for operating an occupant restraint system with a tension sensor (called a "tension switch" by Aoki) on the belt (see Figure 4a). However, Aoki does not show a sensor between first and second intermediate ends of the belt. While the sensor may be attached to the belt between distal ends of the belt, there are no intermediate ends.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
